

THE  
**TESTMART**

UPGRADING FINOPS TO  
VERSION X

# DYNAMICS FINOPS UPGRADES

---

Releases for FinOps happen regularly. At TheTestMart we keep your tests up to date, giving you time back in your day and piece of mind that your FinOps continues to work

# ENABLE NEW FEATURES FASTER

---

## Overview

By taking more frequent updates companies are able to take advantage of the latest features released by Microsoft resulting in the following benefits:

- Increase team productivity
- Save money by reducing the need for ISV's or third party applications and integrations

# LESS CHANCE OF FAILURE

---

## Overview

Each version of Finops comes with changes that may severely impact your environment by:

- Breaking existing integrations
- Conflicting with ISV installations
- Regressions in D365 customizations
- Create incorrect transactions

Smaller updates mean less change of failures in your FinOps mission critical system

# LESS DISRUPTION

---

## Overview

When you are 4 updates behind Microsoft forces you to take the next release, for seasonal businesses this can happen at the worst possible time, disrupting the business and potentially causing brand and reputational damage

# THANK YOU

---

**Falling behind on your releases, or  
worried bugs following a Finops  
upgrade, contact us to help**
