

RSAT Comparison

Feature	TheTestMart	RSAT
Turnkey Environment Set Up	✓	✗
Supports Multiple Applications	✓	✗
Supports Non-Technical Users (Easy to use)	✓	✗
No Code Development	✓	✗
Rapid Test Development (90% faster)	✓	✗
Low Test Fragility	✓	✗
Automatic Video Generation	✓	✗
Automatic Documentation Generation	✓	✓
Integrated with DevOps	✓	✓
Test Plan Manager and Scheduling	✓	✗
Libraries of Configurable Tests	✓	✗
Library of Pre-Configured Dynamics FinOps Commands	✓	✗
Bulk Test Configuration	✓	✗
Test Version Control	✓	✗
Custom Test Versioning	✓	✗
Variable Set Management	✓	✗
Load Testing	✓	✗
AI Element Interaction	✓	✗
Multi-Browser Support	✓	✗

Other ROI Considerations

Training Costs

Significantly lower due to embedded platform knowledge, no-code UI and managed test model.

Test Building Cost

Automating tests can take on average between 2-4 hours. **TheTestMart includes the build cost** as part of the subscription price.

Test Maintenance Cost

As new software versions are released individual tests will break for numerous reasons and need repair. On average it takes roughly as long to rebuild a test as it takes to debug (i.e. 2-4 hours). Average failure rate per version is between **5-10%**. **TheTestMart includes test maintenance** as part of the subscription price.

Staff Retention Costs

Based on a skillset combination of Automation, Dynamics FinOps and Business knowledge, staff retention and replacement costs can be high. This cost is included in TheTestMart subscription price.

Resource Reallocation

By reducing testing effort in house this allows the team to focus on other business system related issues such as support, business process optimization and special projects to name a few.
