Test Plan Setup

Objective

To provide a clear and concise step-by-step guide for team members to create a test plan within the TestMart platform, ensuring consistency and accuracy in task execution.

Key Steps

1. **Log into TheTestMart**

   o Sign in to your TestMart account to access the library page.
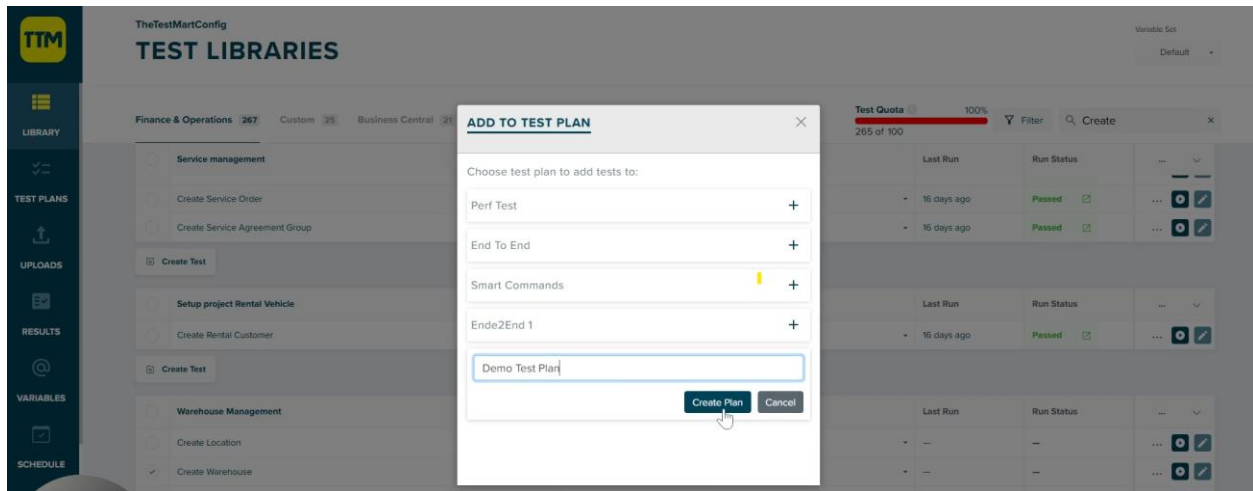

2. **Identify Tests**

   o Use the search bar or press Command + F to find the tests you want to include in your test plan.

   o Select the desired tests by clicking the circle next to each test until a check mark appears.

3. **Create a New Test Plan**

   o Click on the button to add the selected tests to a test plan.

   o Choose "Create New" when prompted to select an existing plan or create a new one.

4. **Name Your Test Plan**

   o Enter a descriptive name for the new test plan (e.g., "Demo Test Plan").

   o Click "Create Plan" to finalize.

5. **Configure the Test Plan**

    o Select the appropriate variable set from the drop-down menu.

    o If applicable, choose the FinOps version for the test plan.

6. **Review Added Tests**

    o Click on the newly created test plan to view the tests included.

    o Ensure the order of tests is correct; they will run sequentially.

7. **Add Headers (Optional)**

    o If your test plan is lengthy, consider adding headers for organization.

    o Click "Add Header" and rename it by double-clicking on the header title.

8. **Add Delays (Optional)**

    o If necessary, add a delay between tests (e.g., for batch jobs).

    o Specify the duration of the delay.

9. **Rename Test Plan (If Needed)**

    o   Access the ellipses options and select "Rename Test Plan."

    o   Enter the new name and confirm the change.

10. **Remove Items (If Needed)**

    o   To remove headers, tests, or delays, click the "Delete" option or red Garbage Icon next to the item.

Important Considerations

- Ensure you have selected the correct tests to avoid errors during execution.

- Be cautious when renaming or deleting test plans, as these actions can affect ongoing projects.

- Always confirm any changes or deletions to test plans before editing or deleting.

Tips for Efficiency

- Familiarize yourself with the library page layout to quickly locate tests.

- Use consistent naming conventions for test plans to enhance clarity and organization.

- Regularly review and update test plans to reflect any changes in testing requirements or procedures.
